RICK G BREWSTER ATTORNEY AT LAW 1513 FLAMINGO WAY SUNNYVALE, CA 94087				GRAHAM, MATTHEW C
ART UNIT		PAPER NUMBER		
		3683		

DATE MAILED: 04/30/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	10/718,353	KIENHOLZ, DAVID A.
	Examiner	Art Unit
	Matthew C Graham	3683

-- The MAILING DATE of this communication app ars on the cover sheet with th correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on ____.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) Claim(s) ____ is/are allowed.
- 6) Claim(s) 1,2 and 4-6 is/are rejected.
- 7) Claim(s) 3 is/are objected to.
- 8) Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on ____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. ____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____
- 4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: ____.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Terao et al.

Terao et al. show A vibration isolation, position actuation device comprising:

a pneumatic actuator 20,

a pressure servo-valve 13, 14, 34,

an air pressure supply 12,

a coil and magnet (motor 26),

a state variable sensor (encoder 30), and

a control unit 32,

wherein the pressure servo-valve accepts an input command signal and modulates the air pressure supply which is applied to the pneumatic actuator, wherein the state variable sensor 30measures a state variable of the pneumatic actuator resulting from the applied modulated air pressure supply, wherein the control unit determines the error (e1) existing in the measured state variable relative to the command signal (X1), and wherein the control unit modulates electrical current applied to the coil such that a magnetic force is applied to the pneumatic actuator by the magnet

in such proportion to negate the measured error in the state variable of the pneumatic actuator (see column 10, line 65 - column 11, line15).

Re- claim 2, the air volume provides a predetermined stiffness.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Terao et al. in view of Davis et al.

Re- claims 4-6, the claimed invention differs from Terao et al. only in the type of magnet actuator and the type of sensor.

Davis teaches the use of a linear magnetic actuator and pressure sensors for controlling an isolator.

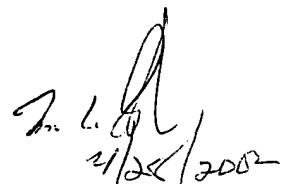

It would have been obvious to one of ordinary skill in the art to have utilized a linear motor and pressure sensors in Terao et al in view of the teaching of Davis et al. as a mere substitute of known equivalents dependent on the associated environment or intended use of the actuator.

5. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamaoka shows a electromagnetic isolator.

Art Unit: 3683

7. Any inquiry concerning this communication should be directed to Matthew C Graham at telephone number 703-308-2570.

A handwritten signature in black ink, appearing to read "Matthew C. Graham". Below the signature, the date "2/22/2002" is handwritten.
